

The Individual Learning Plans or ILP's for Kentucky's 6th grade through 12th grade students are helping students prepare themselves for their future. In the Hart County School District, students begin with an interest inventory in 6th grade and complete an ILP Planning document based on these interests. Students continue to revisit the ILP planning documents each year as they learn more about the specific field of interest or learn how the interests may change.

The ILP has many features and resources that involve students on a variety of levels:

- Exploring careers beginning in the 6th grade
- Finding careers that match their skills and interests
- Creating education plans
- Establishing personal goals and revisiting these as they progress through school
- Creating, maintaining, and changing resume`
- Tracking and reflecting on their community services experiences, work experiences, activities, and extra-curricular, and organization activities
- Exploring colleges and postsecondary opportunities that match their career, postsecondary, and life goals
- Connecting to the KHEAA.org (Kentucky Higher Education Assistance Authority) Website for help with college planning, tuition assistance information, and applications
- Collecting personal information like assessment results, advising activities, demographic information, and educational history

For more information about the ILP process in Hart County Schools, please contact your child's school or ask your student to share their ILP Planning Document which identifies specific interests based on the O*Net Interest Profiler.
